Sonomono®
ソノモノシリーズ

The Sonomono series yarns are made by blending natural color raw yarns without using any dye. They have natural colors and textures just as in the raw wool.

◀ Note ▶

Sonomono uses natural colored wool, which may cause different colors in batches with the same color number, depending on the production date. We recommend purchasing enough yarn in one batch to complete the garment.

Family
Yarn

<Washable yarns for hand-knitting>
Longtime favorite

わんぱくデニス。
かわいい赤ちゃん。

Washable yarns for hand knitting are made with functional materials that can be machine-washed normally. They have a texture highly resistant to change from normal machine washing and are free from shrinking or losing their shape. They are also resistant to pilling and highly antistatic, which prevents an uncomfortable harsh feeling.

"WANPAKU DENIS" for kids and "LOVELY BABY" for babies are cherished products launched in 1987 and 1989, respectively.

Cautions on using Washable yarns for hand knitting

- Always use standard gauges indicated.
- Use a lingerie laundry bag washing.
- Do not use a dryer.

Able to wash without detergent!
Hamanaka Bonny Series
Bonny Scourer

- Just rub dishes with scrubber and hot or cold water. All oil, tea stains and grime remove easily leaving nothing but shine!
- Also completely removes hard water scales in your bathroom!
- Prevents rough hands by eliminating the use of detergents.
- Its soft texture does not damage your precious dishes!

Why is dirt removed?

● **Micro-lines in fiber wipe off dirt!**
 The Hamanaka Bonny series uses acrylic monofilaments, which have microscopic micro-lines (streaks) and grooves along the surface when seen with a microscope. These ridges and grooves in micrometers (1/1000 millimeters) scrape off dirt, resulting an excellent washing without detergent.

Microscopic photo

● **Soft elastic characteristics help remove dirt!**
 The Hamanaka Bonny series consists of comparably thick acrylic fibers, which adds elasticity to the yarns. Due to its softness and elasticity, together with its tension and resilience, the product perfectly fit on the surface of washed tableware, thereby exerting an excellent wiping-off performance.

● **Breathability and water permeability help remove dirt!**

The Hamanaka Bonny series consists of multiple types of acrylic monofilaments having different thicknesses and natures, including conjugated fiber, bulky fiber, and regular fiber, bringing bulkiness to the yarns. This creates a lot of space between the fibers for excellent water penetration and quick removal of dirt from the fabric. It also has an excellent breathability, so it dries quickly.

Moreover...top-dyeing
 achieves extraordinary softness and bulkiness!

The Hamanaka Bonny Series yarns are top-dyed. After dyeing raw materials (staple fiber), they are spun and bulk-processed to achieve soft, bulky and voluminous yarns. They don't shrink in the wash, they dry quickly, and they retain their fluffiness they are also processed to have anti-bacterial and deodorant effects, making them very clean! In addition to Bonny Scrubbers, the Bonny series is been widely used for many other knitted and crocheted items such as cushions, and stuffed toys.

* White yarns are not top-dyed.
