A Note from Mirii Kirino

Hamanaka's "Kodawari" felt wool brings to the market wool that I have been wanting for more than 10 years. The carefully selected natural colors are as close as possible to actual animal hair, one of the most important factors for producing realistic felt wools that can be used in a wide range of applications, from flocking to making bases. These ideal colors are the result of more than 10 years of research and are essential to create realistic felt wool handicrafts.

Natural Blend

The reason Natural Blend is a common choice for felt artists...

- Hamanaka's proprietary blend of British and merino wools provide a truly high-quality finish for felting.
- British wool is bulky, providing a solid thickness when used.
- Merino wool, meanwhile, produces a softer texture.
- Achieve the same effects for wet felting or needle felting.

Note	<ul style="list-style-type: none"> ● Iron at low temperatures with a damp cloth only. ● Because nylon fibers tend to stick to clothes and the like before felting, an apron is recommended.
Compatibility	Best: Needle felting Not recommended: Futte Futte Ball Maker OK: Wet felting (Will be slightly soft upon finishing)

Natural

3 varieties

Washed, uncolored natural wool.
Textures vary depending on the variety of sheep.
Use according to the needs of your creation.
Also usable for hand dyeing or spinning.

*Shipment units differ from those for other wool products.
*Because Hamanaka's Natural wools are not dyed, a yellow tint may appear over time. This is a natural, unavoidable characteristic of the wool. We appreciate your understanding.

For bags

Thick, yellowish fibers for use with solid-finish creations.

Colored Wool

Ecological wool with a natural color and texture.

2 varieties

- The natural hues of this wool may result in color differences depending on the production time. In addition, this wool may become slightly discolored over time.
- Because no dyes are used in order to retain the natural texture of the wool, some grass or smells may still be noticeable.

[Scoured Merino Wool]

Scoured wool refers to wool that has been washed to remove impurities and then dried. This type of wool maintains the natural curling of the sheep from which the wool was obtained.

Notes about Scoured Wool

Scoured wool maintains the natural curling of the sheep from which the wool was obtained. This material makes a great base material for creations.

- With Needle Felting
Natural blends or other wool is used for the core (for example, the torso on the sheep to the right), and the scoured wool is felted onto the core. If the wool is difficult to prick, loosen it slightly and prick it into place.

Realistic Material
