Able to wash without detergent!

Hamanaka Bonny Series

Bonny Scourer

A marvelous washing effect!

An ecological scrubber easy on your hands and the environment.

Safe and secure!

Acrylic yarns made in Japan

- Just rub dishes with scrubber and hot or cold water. All oil, tea stains and grime remove easily leaving nothing but shine!
- Also completely removes hard water scales in your bathroom!
- Prevents rough hands by eliminating the use of detergents.
- Its soft texture does not damage your precious dishes!

Why is dirt removed?

●Micro-lines in fiber wipe off dirt!

The Hamanaka Bonny series uses acrylic monofilaments, which have microscopic micro-lines (streaks) and grooves along the surface when seen with a microscope. These ridges and grooves in micrometers (1/1000 millimeters) scrape off dirt, resulting an excellent washing without detergent.

●Soft elastic characteristics help remove dirt!

The Hamanaka Bonny series consists of comparably thick acrylic fibers, which adds elasticity to the yarns. Due to its softness and elasticity, together with its tension and resilience, the product perfectly fit on the surface of washed tableware, thereby exerting an excellent wiping-off performance.

●Breathability and water permeability help remove dirt!

The Hamanaka Bonny series consists of multiple types of acrylic monofilaments having different thicknesses and natures, including conjugated fiber, bulky fiber, and regular fiber, bringing bulkiness to the yarns. This creates a lot of space between the fibers for excellent water penetration and quick removal of dirt from the fabric. It also has an excellent breathability, so it dries quickly.
